

Just like we have some rules that we follow to speak English(the grammar), we have some rules to follow while writing a Java program. The set of these rules is called **Syntax**.

Comments

Single-line comment: Use `//` to add a single-line comment.

Example : `// This is single line comment`

Multi-line comment: Use `/* */` for comments spanning multiple lines.

Variables

A variable is a container that holds data. This value can be changed during the execution of the program.

Before use, you need to declare and define it.

1. Variable Declaration:

```
int age;
```

```
String name; //int and string is data types
```

2. Variable Initialization:

```
age = 69;
```

```
name = "the boys";
```

3. Combined Declaration and Initialization:
